

CENTRAL VALLEY AGRONOMY

KNOWLEDGE YOU CAN TRUST

Volume 1, Issue 2
May 26th, 2009

This Newsletter will be published monthly and available on our website www.centralvalleycoop.com. If you would like it emailed to you, please contact us with your address.

Increase Yield & Product Savings with AgriEdge.

According to Syngenta's trials, the yield average of 5000+ AgriEdge Soybean Program growers in 2007 exceeded the USDA national average by more than 30% or 12 bu/A. In general, the AgriEdge program is about giving your Syngenta brand hybrids (NK, Garst & Golden Harvest) the best chance for increased yield. First, protect the seed with Cruiser. Second, eliminate weed competition with the use of Syngenta brand herbicides like Camix, Dual, Prefix, Callisto, and Touch-

down. Third, protect and promote your crops health and yield potential with the use of Quilt or Quadris fungicide. Earn up to \$9.00 per acre. **The Equivalent "per gallon" discounts are listed above for many of the eligible products.** For qualifying use rates or more information about the AgriEdge Corn and Soybean Programs, please contact a Central Valley Agronomist. Deadline to submit invoices and redemption form is October 1st, 2009.

AgriEdge Discounts

Callisto	\$64.00/gal
Camix	\$10.00/gal
Prefix	\$4.00/gal
Halex GT	\$6.67/gal
Quadris	\$21.33/gal
Quilt	\$9.14/gal
Touchdown	\$5.34/gal

Get 180 - Days No Payments/No Interest on all your plant health and insect control needs with Farm Plan.

Now is the best time to purchase plant health and insect control products in order to take advantage of special finance rates that will improve your cash flow and contribute to a more profitable year. All fungicides, insecticides and Max-In foliar feeds are eligible. When having Central Valley custom apply these products, any other products that are included in the tank

mix are eligible for this special financing option (including application). **On any acres signed up for Central Advantage, if you don't realize an increase in yield through the use of these products - we will credit back the application!** See your agronomist for details and a field evaluation. Buy now and save, just say "put it on Farm Plan". No minimum requirements.

"Crop Assessment" program for our Seed Customers.

With planting complete, it's time to monitor the progress and health of your crop. Through out the summer **our agronomists and interns will be performing a "crop assessment" on the seed you purchased from Central Valley.** If you wish to have other fields assessed or scored, let us know, we would be happy to do this. We will be recording the findings of a five point crop development check list on a report that will be presented to you later in the year. The ratings, timing and forms were developed, to maximize the value as it applies to your decision making process. Most of the "field condition ratings" will be done during our normal weed, insect and disease scouting visits.

SPECIAL PRODUCT OF INTEREST:

MAX-IN MICRONUTRIENTS

- Season long approach to fertility - replenishes Zn, Mn and B
- Crop-based adjuvant system for max efficacy
- Promotes early plant vigor and health
- Essential for photosynthesis and plant energy
- Increase primary nutrient efficiency
- Tank mixes very well - reduce application costs
